

Enterprise Roadside Assistance Operations Handbook

This handbook is a comprehensive reference for an emergency roadside assistance company. It is designed for dispatchers, mechanics, supervisors, customer support agents, operations managers, quality auditors, and engineering teams building knowledge systems (such as a RAG-based assistant).

1. Company Overview

Mission, vision, values, code of ethics, customer-first philosophy, operational hierarchy, regional coverage, shift planning, compliance requirements.

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

2. Standard Operating Procedures (SOPs)

Customer call handling

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Ticket lifecycle

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Dispatch process

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Mechanic assignment

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Live GPS tracking

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Escalation matrix

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Incident closure

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Customer feedback workflow

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

3. Customer Support Manual

Greeting scripts

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Identity verification

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Emergency triage questions

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Handling angry customers

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Handling repeat breakdowns

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Refund policy

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Complaint escalation

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

4. Dispatch Operations

Nearest mechanic selection

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

ETA calculation

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Redispatch rules

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Peak-hour management

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Night operations

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Weather contingency

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

5. Mechanic Training Manual

Professional conduct

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Safety equipment

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Diagnostic methodology

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Repair approval

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Digital documentation

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Photography standards

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Tool maintenance

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Daily checklist

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

6. Vehicle Troubleshooting Guide

Engine won't start

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Battery issues

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Alternator failure

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Starter motor

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Flat tire

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Brake failure

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Clutch issues

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Transmission faults

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Engine overheating

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Coolant leaks

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Oil leaks

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Fuel system

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Electrical faults

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

OBD-II diagnostics

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Sensor failures

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Suspension problems

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Steering issues

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

AC failures

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

7. EV Roadside Assistance

High-voltage safety

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Isolation procedures

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Charging connector faults

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Portable charging

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Battery thermal events

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Manufacturer precautions

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

8. OEM Reference

Maruti Suzuki

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Hyundai

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Tata Motors

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Mahindra

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Honda

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Toyota

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Kia

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

MG

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Renault

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Volkswagen

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Skoda

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Nissan

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

9. Towing & Recovery

Flatbed towing

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Wheel-lift towing

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Accident recovery

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Winching

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Vehicle loading

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Motorcycle recovery

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

10. Emergency Handling

Road accidents

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Fire

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Flood

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Landslide

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Fuel leakage

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Medical emergencies

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Police coordination

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

11. Insurance Claims

Cashless process

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Reimbursement process

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Required documents

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Survey coordination

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Claim rejection handling

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Fraud prevention

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

12. Service Workflow

Request → Authentication → Ticket → Dispatch → Tracking → Diagnosis → Approval → Repair/Tow → Digital Report → Payment → Feedback → Closure

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

13. SLA & KPI

Response time targets

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

First-time fix rate

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Mechanic utilization

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Customer satisfaction

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Average repair duration

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Escalation compliance

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

14. Incident Reports

Breakdown report template

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Accident report

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Mechanic report

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Supervisor review

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Root cause analysis

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

15. Forms & Checklists

Vehicle inspection checklist

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Safety checklist

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Mechanic toolkit checklist

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Insurance document checklist

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Customer handover form

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

16. FAQ

Membership

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Coverage

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Payments

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Warranty

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Spare parts

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Tracking

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Data privacy

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Cancellation

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Refunds

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

17. Knowledge Base for AI/RAG

Document tagging

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Metadata

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Chunking strategy

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Versioning

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Approval workflow

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Search keywords

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and

maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Embedding recommendations

Section 1. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 2. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Section 3. Detailed guidance: Follow standardized procedures, document every action with timestamps, capture before/after photographs, communicate clearly with the customer, prioritize safety, use manufacturer-recommended practices, escalate unsafe conditions immediately, and maintain complete digital records for auditability. Include decision trees, examples, exceptions, quality checks, and post-service review.

Appendix

- Emergency contact escalation matrix
- Common diagnostic trouble codes (DTCs)
- Recommended mechanic toolkit inventory
- PPE standards
- Customer satisfaction survey template
- Training assessment checklist
- Glossary of automotive terms
- Revision history and document control
